33rd Sale

# Saturday- April 10-2021

## ANGUS-CHAROLAIS-RED ANGUS x CHAROLAIS 12:00pm CST

### Auctioneers

Kyle Elwood  
785-493-2901

Ethan Schutte  
785-541-1027

### Special Guests

Clint Woodrow, President, Kansas Angus Association  
Spencer Schrader, President, Kansas Charolais Association

### Livestock Journalists

Bill Bowman ..... 816-752-0079  
Guy Peverley, *Stock Exchange*..... 785-456-4390  
Kristian Rennert ..... 308-440-9463  
Stephen Russell, *Kansas Stockman* ..... 785-458-2650

### Transportation

Manhattan, Kansas, is approximately two hours west of Kansas City, Missouri, and is served with commuter flights from Kansas City International. Rental cars are available at the Manhattan Airport. Travelers Express Shuttle Service is available from Kansas City to Manhattan. Reservations can be made by calling 785-539-2284. Galen and Lori Fink will gladly meet planes on request at the Manhattan Airport and provide transportation to and from the sale site, which is approximately 20 miles from the airport.

### Accommodations

Hilton Garden Inn—Manhattan ..... 785-532-9116  
Best Western—Manhattan ..... 785-537-8300  
Clarion Hotel—Manhattan ..... 785-539-5311  
Comfort Inn—Manhattan ..... 785-770-8000  
Fairfield Inn—Manhattan..... 785-539-2400  
Super 8—Manhattan ..... 785-537-8468  
Cedar Court—Clay Center ..... 785-632-2148  
Best Western—Marysville ..... 785-562-2354  
Super 8—Marysville ..... 785-562-5588

### Pre-sale Friday evening, April 9

At Fink sale headquarters. Look through the cattle at your leisure and food will be available.

### Breakfast, Saturday morning, April 10

Rolls, donuts, coffee and juice will be available the morning of the sale.

### Sale Day Lunch

Lunch will be available at the bull sale, compliments of Finks.

### Sale Location

**Fink Beef Genetics Sale Facility** is located:

Approximately 22 miles northwest of Manhattan on Hwy 77.  
Approximately 35 miles south of Marysville on Hwy 77.  
Approximately 25 miles east of Clay Center on Hwy 24, then north on Hwy 77 approximately 8 miles.

The sale facility is approximately .8 of a mile north of the Randolph Short Stop gas station on Hwy. 77, on west side of the road. If coming from the North, watch for signs after crossing the Fancy Creek bridge, approximately 1/2 mile from our turn.

### Livestock Mortality Insurance

Representatives from American Livestock Insurance Company will be at the sale to assist you with mortality insurance for your purchases.

### Terms and Conditions

The cattle will sell under the Standard Terms and Conditions as recommended by the American Angus Association and the International Charolais Association, however the Fink guarantee is the best in the Nation and stands behind the bulls with guarantee outlined in this catalog.

### Inspection of Cattle

All cattle may be seen **after 3:00 P.M., Friday, April 9, as we will be transporting the bulls to the sale location until then.** To view before the 9th, contact the Fink Ranch. Please call ahead for viewing if possible.

### Liability

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety of the behavior of the animals. The owner, sale management firm, and the sale staff assume no liability for property loss or accident that may occur.

**If the weather is bad, contact us for further information, and watch our FaceBook page for updates.**

### Sale Day Phones

Sale Facility.....785-293-5176

# The Balanced Program

## FINK BEEF GENETICS

15523 Tuttle Creek Blvd, Randolph, KS 66554

[finkbeefgenetics.com](http://finkbeefgenetics.com) and *find us on Facebook!*

**Galen:** 785.532.9936 **Megan:** 785.410.5559 **Office/Lori:** [finkbull1@twinvalley](mailto:finkbull1@twinvalley)

Dear Producers,

Thank you for taking the time to review our Spring 2021 Bull and Female sale catalog. We do appreciate everyone's support and interest for over 39 years. If we don't keep you in business, we won't be in business!

Balance is still the focus of our program—really our goals haven't changed in all of these 39 years—we just try to produce functional, profitable, realist genetics for you.

We have got to see many fads, and chases for extremes in that timeframe. We are known for middle-of-the-road cattle—ones that profit in the most areas, allowing more profit in more areas for our customers.

Our Spring sale will permanently be the 2nd Saturday of April from now on. Two main reasons are customer-focused:

1. Bulls closer to turnout-time saving feed and headaches for customers.
2. Allows customers to semen-check their current bulls later (early April) to know their bull needs prior to the breeding season.

Thank you for any potential interest in our program and please call us with questions or for more information.

Thank you,

Galen

**(p.s. Actual scrotals available sale day.)**

BULLS CAN BE VIEWED ONLINE AT  
[finkbeefgenetics.com](http://finkbeefgenetics.com) or [dvauction.com](http://dvauction.com)  
after March 25th.

BEEF GENETICS

FOR OVER 39 YEARS!

Chad, Megan, Whitley Larson; Galen and Lori Fink

Hadley Schotte

Nick Hargrave

Gene, Anna, Payden & Ella Barrett

The Barrett Broadie Family

## Guarantees

### Announcing the first 3-year guarantee...A Fink Industry First!

- All bulls have been evaluated for structural soundness, fertility, and disposition.  
 - Starting fall 2010, the following policy has been in place.

#### 1st Year Guarantee—Single Bull Pasture

Full coverage for 12 months from date of purchase:

- Broken penis in single-sire pasture
- Structural problems due to feet, swollen hocks

#### 50% coverage purchase prices—Multi-sire groups of bulls

- Broken penis
- Stifle
- Broken legs
- Lightning
- Disposition

**+Exception:** Foot rot; nails in hooves; penile cuts due to wire, corn stalk leaves, etc.; illness; diseases; freeze damage; testicle injury, etc.

**+Any reproductive injuries must be examined by a veterinarian within 48 hours** of injury. Quick treatment can cure many problems. Injuries not checked and treated promptly will not qualify for 50% coverage. A letter from your vet will be requested.

**+We do not guarantee bulls to freeze semen.**

## 3-Year Guarantee

- Any bull sold by Finks that proves to be structurally unsound, infertile, due to foot shape, swollen hocks or failure to pass a complete BSE exam is guaranteed for 36 months from date of sale.
- That guarantee will apply providing the bull's incapacity is not caused **by injury, disease, or founder** since leaving Finks. The value remaining is calculated on the basis that the guarantee is reduced by one-third of the purchase for each year of service.
- A veterinarian certificate **must** be supplied by the purchaser. Fink reserves the right to have bull semen tested by two different veterinarian clinics, if requested.
- **If you have a past credit for a Fink bull, you may use that on a Fink bull in a future bull sale. Same applies to a Barrett bull, you may use it on a future Barrett bull. (We apologize, but we cannot mix credits between Fink or Barrett bulls.)**

**It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot fully replace a bull that is injured or dies for any reason. We recommend you insure animals against injury. This includes not putting younger and older bulls together; and having too many bulls in relation to too few cows. Any guarantees will be covered by satisfactory bull replacement, if available, or credit on future bull purchases for the amount covered.**

Remember, at Finks, you keep any salvage value! Always have!

## Fink Customer Marketing

For many years, we have helped customers market their cattle and we take this job very serious. As time has progressed, we have also progressed in our methods, reaching more potential buyers and contacts than ever before. In 1995, we developed calf sales; 1996, females Genetic Credit, Alliance and feedlot partnerships. We have given numerous speeches, and have had articles written about our innovative approach to customer marketing.

### 2010 to Present

- Developed a system to ensure that when a **customer sells calves, stockers, fats**, we get that information out to over **350 potential buyers**. With our network we make no guarantee to the sellers, but we sure do try hard! Female sales go out to over **1,200 plus!**
- Work closely with local markets, Superior Video, and other internet sales across the United States.
- Genetic credit program (rewards for carcass data)

- Feedlot connections
- Alliances  
 USPB: 866-877-2525  
 Angus & Charolais GeneNet, Ken Conway: 785-628-3004
- Genetic, marketing, consulting service
- Creekstone Farms: Contact Jake at 620-218-0128

## 2021 Bull Buyer Information

**Bulls will sell in sire group order.**

### Sight Unseen Program

If you can't make it to the sale, we will do our best to represent the bulls to you. **Please call at least 5 days ahead of the sale, if possible, to go over your needs. This gives us time to determine the best possible bulls for your operation and get back with you to discuss them.** You may leave bids with us if desired, we will buy the bulls as cheap as we can, or you may call any of the representatives. **Our program is built on trust and honesty.** All bulls have had **full BSE (breeding soundness exam)** by Dr. Don Musil, Prairie Valley Vet Clinic, Blue Rapids, KS. **Scrotal measurements are not adjusted, they are actual, taken on March 12 for Fink bulls only.**  
**\$50 off per bull** — if bulls are picked up sale day or on Sunday, April 11, or Monday, April 12, at the sale site.

**Free Delivery** — To the nearest major stockyard in the continental United States. **Delivery will start Sunday, April 11.** We appreciate your understanding of meeting semi-trucks at a central point or along an interstate.

**3% Discount on four bulls** or more by one buyer.

**Herd Health** — At weaning, all bulls received: Resvac 4/somuback, one shot Ultra 7; Dectomax pour-on, Multimin. All bulls received vibrio and leptospirosis at semen checking, plus Dectomax. All bulls have been checked negative for BVD.

**EPDs for Angus are current as of February 22, 2021.**

**EPDs for Charolais are current as of February 22, 2021.**

**Retaining 1/2 semen interest in every bull in this sale.** We have retained an interest in every bull since 1994. Because it generally takes several years for a sire to be 'discovered,' we feel we can help our customers through various programs, 'find' and 'market' bulls that float to the top. You will own full possession and 100% salvage value of the bull. We are retaining the right to half the semen sales revenue from the bull if, sometime in the future, semen sales become a possibility. If for some reason you should sell the bull to another breeder, Fink Beef Genetics still retains that 50% semen interest. If you purchase a partnership bull and wish to have semen collected for your own herd use, that semen is 100% yours, unless you contact Fink Beef Genetics and we agree to have him collected in a joint venture. If the bull is collected in a joint venture, we split the semen production costs and the revenue of sales on a 50/50 basis. However, if you are not interested in collecting semen on the bull, Fink Beef Genetics will have the right to collect the bull for their own use and will pay expenses for collection(s). We will have him collected at your convenience.

**We have not included any actual information** — except scrotal measurements taken March 12 on Fink bulls. Why? Because of variations due to cooperator herds we feel the EPDs, because of the use of high-proven sires, are still the best information to use. When we are convinced that all the data can be compared accurately, we will print it.

### Ultrasound Data

Fink bulls were ultrasound measured on February 5, 2021 by Lazy H Cattle Services, Becky Schmitt, Glen Elder, Kansas. The data is from The CUP Lab® in Ames, Iowa. Data received back is listed in each bull's information.

## Thank you to the following individuals

Thank you to Dr. Don Musil, Barb Lange, Kaleigh Bloomfield, and Jennifer Martin, Prairie Valley Vet Clinic, Blue Rapids, Kan, for all our health work. They are always on the cutting edge with information and advice.

Thank you to Cross Country Genetics, North, Dr. Kirk Gray, Dr. Clay Briener, Dr. Joel Anderson, and crew. Dr. Gray has done our embryo work since 1988! Special thanks to the crew for keeping it all straight!

## 2020–2021 Cooperators

Since 1989 we have worked closely with cooperator herds on embryo implantation in expanding our numbers. This includes commercial operations that run Fink females. This has proven to be a workable option for both parties. We believe the beef business is about working together. In some cases the breeders may show other than Fink on the registration certificate, but **rest assured** they are guaranteed with the same genetics, service and conditions. Any problems,

should they occur, will be handled by Finks.

[steaksfortroops@gmail.com](mailto:steaksfortroops@gmail.com) or [steaksfortroops.com](http://steaksfortroops.com)

**IF YOU LOOK AT NOTHING ELSE IN THIS CATALOG,  
PLEASE LOOK AT THIS:**

**Let the Cow Save You Money,  
and the Bull Make You Money**

By Kris Ringwall

We've reprinted **a portion** of Kris' article, **Let the cow save you money and the bull make you money**, below.

Read Kris' full article and others at:

[www.ag.ndsu.edu/dickinsonrec/beeftalk-articles-1](http://www.ag.ndsu.edu/dickinsonrec/beeftalk-articles-1)

... Second, recognize the importance of monitoring cow size.

**The maintenance of excessively large cows has proven difficult to offset with increased weaning weights.** The center has targeted mature cow size at 1,100 to 1,300 pounds. Although individual calf weights will be lighter, total **calf weight based on calves produced per acre will be greater, resulting in more total pounds of calf.**

Third, recognize the importance of good bull selection using technological advancements that improve accuracy. Generally, keep expected progeny differences (EPDs) above the **50th percentile within the desired traits and breed. As matter of practicality, become comfortable with bulls that are above the 50th percentile but may not exceed the upper 30th percentile for commercial production.**

Fourth, recognize the value of breeding systems, maximizing the traits of interest in the **terminal sire program while balancing appropriate traits on the maternal side. Let the cow save you money and the bull make you money.**

## "You've never seen a fat athlete, have you?"

A Discussion of Ultrasound Data: Backfat — Marbling — Ribeye  
We hesitate to print this data every year because we know it gets compared between other purebred breeders' sales and even within our own contemporary groups. The best advice is use the EPDs first, then actual data provided second.

Why are Fink bulls different so that this data isn't comparable to others?

- Fink bulls are among, if not the leanest bulls, that sell in the U.S. We do this to ensure soundness and fertility for you by not fattening the bulls.
- Feeding can make impressive IMF and yearling weights. but EPDs are still the most reliable!
- Bottomline... We try to develop bulls that cover all the bases. We just bypass fat-filled scrotals, and keep our bulls as sound and fertile as possible. Customers' carcass data for over 30 years indicate that Fink-bred cattle will compete with anyone's. We take great pride in selling bulls that should last several years.

*To borrow from the late cattleman, Andy Olson,  
"You have never seen a fat athlete, have you?"*

We DNA both the Angus and Charolais bulls. The results will be reflected in the Angus EPDs. DNA is like any other tool—just keep everything in perspective on how you use it. We are trying it to, hopefully, present to you with the most current data to level environmental differences. Because of our large embryo program, cooperator herds, etc., environment can play a large role in actual weaning and yearling weights. Charolais EPDs update two times per year. The DNA will not be expressed in the Charolais yet.

As always, please contact us with questions.

### Angus Bulls' EPDs have been genomically enhanced using Neogen GeneSeek through Angus Genetics, Inc.

Rick Pfortmiller, 785.230.9507, rportmiller@neogen.com

### BARRETT CATTLE BULLS

For your reference in looking through the bull data: As part of our development, we stopped creep feeding 8 years ago. After weaning, the bulls are developed on bromegrass/fescue-mix pastures from late April through October. From November to sale date, they continue on fescue-mix pasture, and are supplemented with a rolled corn/protein blend and limited brome hay.

Only bulls that passed a BSE by approx. 13 months (Oct. 10) were kept in the sale group. BSE's were conducted by Dr. Tom Taul, Sharon Tucker, and Casey Olson, KABSU, Manhattan, Kansas.

The bulls received Virashield 6 + VL5 HB and Synanthic drench the first of October; and Virashield 6 + VL5 HB, and Dectomax Pour-on, the first of March. All Bulls BVD PI free. Scrotal measurements will be available sale day. To see the bulls before the sale, don't hesitate to give us a call: Gene: 785.224.8509 or Payden: 785.318.2004. Updates will be posted at: [barrettcattle.com](http://barrettcattle.com).

Thank you again for your interest, we appreciate it.

B P F Special Focus 504  
Basin Joy 204R

We're excited to offer a new sire group with 4404 and have been impressed with these bulls and their heifer mates. Extremely good disposition, length, depth and capacity; we look forward to calving the first heifers out next fall, and hear udders and feet are exceptional.

**Really nice outcross heifer bull option for our customers.** These will be easy-fleshing cattle with good dispositions. Very complete in there kind, thickness and cow-maker phenotype, too.

Overdrive sires impeccable udder quality and teat size, quiet, excellent-disposition cattle. Expect calves to be thick-made and deep. Note Overdrive will tend to sire a touch more frame than Super Duty.

 DCF 9078 036 4193

Extremely balanced EPDs. Excellent teat size and udder quality.  
 Generally moderate-framed, **Super Duty reduces cow frame size, but still adds body, volume and thickness.**

Some of the best females we have ever bred are showing in this bull's pedigree, also in Barrett's. EPDs are very easy to change for extremes, but many that use extreme EPDs in one area may be questioning that in a few years.

*Fink-sired calf at Jayson and Shawnda Davis' in Missouri.*

FULL BROTHERS ARE GROUPED TOGETHER IN SHADED  
 BOXES AS THE SET ABOVE.

BULLS CAN BE VIEWED ONLINE AT  
[finkbeefgenetics.com](http://finkbeefgenetics.com) or [dvauction.com](http://dvauction.com)  
 after March 25th.

# CHAROLAIS

The beef industry is like everything else—it keeps changing, as the world changes. There will always be a demand for quality beef, the question is how much and how we get there. Charolais-cross cattle have proven they can do it. ‘Smokies,’ or ‘Cinnamon’ cattle sired by good Charolais bulls can hit many targets on a set of British or eared females. High % choice plus prime with **yield grades of 1 to 3**, without an excess of fat (**which costs money to put on**) will continue to be very profitable.

Many folks often ask why we started Charolais in 1999. We felt the direction many were taking in the Angus breed (**more growth, more terminal, more excess past the point of profit**) **was not where we felt the Angus breed was at its best.** Options—start a second breed that was proven in the feedlot and on the rail for our customers to use if they wanted. There was no second thinking the breed—Charolais. **This way we could maintain and constantly improve the Angus female and not risk making her terminal.** Hybred vigor is proven. ‘Bank’ on it.

Our Charolais are bred with attention to all traits, however, first and foremost is birth weight. We have three- to four-generations of lighter birth weight stacked in our pedigrees. We know a live calf makes the most money. We also have **developed some of the highest marbling genetics in the breed** to make sure our customers hit as many targets as possible. Feet, disposition, fertility, ‘slicking off,’ are just as important as all the other traits. Hybred vigor is a fact of life. **Excess fat costs someone money** — muscle, gain, conversions, lean retail cuts, are a fact of life. Total pounds (the right kind of pounds) are a fact of life. Need extra pounds off a set of British cows without calving problems? **Call us!**

DNA is like any other tool—just keep everything in perspective on how you use it. We are trying it to, hopefully, present to you with the most current data to level environmental differences. Because of our large embryo program, cooperator herds, etc., environment can play a large role in actual weaning and yearling weights.

**Fink Spring Charolais Bulls' EPDs have been genomically enhanced using Neogen GeneSeek®.**

Rick Pfortmiller, 785.230.9507, rpfortmiller@neogen.com

The DNA results are not reflected in the EPDs listed in this catalog as the American-International Charolais Association runs sire evaluations twice a year.

Ultrasound was done on February 5, 2021, by Rebecca Schmitt, certified technician, and processed through The CUP® Lab in Iowa.

**Please note, full brothers are grouped together in shaded boxes like this one.**

**As always, please contact us with any questions, and visit our website at: [finkbeefgenetics.com](http://finkbeefgenetics.com) for the latest updates and announcements.**

 WCR Miss Duke 9026

11 years old this fall and bred a set of cows this summer. The best bull of any breed we have ever worked with. Disposition that he passes to his calves is unbelievable. At the age the EPDs are normally depressed by younger bulls (with less accuracy), Gold Standard is still Top 15% WW, 8% YW, 50% Milk (perfect for us), 5% udder, 25% teat, 2% carcass weight (Time Payoff), 25% RE, minus fat, 30% marbling and 8% TSI. Considering all traits, he may be the most proven, balanced bull in the breed. Generally a teat and udder improver on his daughters. Fertility? Froze over 3000 units of sexed semen—not many bulls will work for that. Calving ease? Top 40% with a 7.2 BW of .7. Charlene Sheppard made the mating that created this top-selling bull in our 2011 bull sale for \$18,000. He has been admired by visitors from all over the world—no matter the breed they are involved in!

 4 brothers to these bulls averaged over \$6,100 in last fall's sale. 035 came in a lot lighter at weaning due to his recipient dam. Opportunity knocks on him for the watchful producer. Our ration is slow gain, not a feedlot for steers.

Top 15% WW, 8% YW, 10% SC, 4% CW, 5% Marb, 6% TSI  
 I've lost track of how many full brothers to these bulls we have sold in past sales. The dam continues to stamp her sons. Should be a popular set of bulls for many reasons. Last Fall, 4 brothers sold from \$5,000 to \$7,000, and went to some very good producers!

Christmas 2020. Whitley with her great-grandmother, June Hagenbuch, Megan and Chad.

 Double-H Bobsy 424P LT Prairie Maid 4054  
 Double-H Dancewithme209M KC Stolichnaya H016 P ET  
 JWK Dancer J176

Number one bull in the entire breed of proven sires for marbling. Also top 3% YW, 7% CW, 15% RE, minus fat of -.007, 1% Marb at .59, and 1% TSI at 254.97. We have kept a few daughters of Flash to build around that are really nice—however, we recommend that his sons be strictly used as terminal. If you are feeding your own cattle, take a hard look at Flash sons. He is a real deal for a lot of traits.

This bull was too young to scan. Very young—we may pull him from the sale as his mother is old and he weaned off light due to milk. However, this bull has as much marbling, growth, and high TSI as any bull in the breed possibly. Don't overlook his potential if we do sell him — maybe the best buy of the sale!
