Comfort Inn—Manhattan 785-770-8000
Courtyard by Marriot—Manhattan 785-587-1972
Fairfield Inn—Manhattan 785-539-2400
Hilton Garden Inn—Manhattan 785-532-9116

Pre-sale Friday evening, April 8

At Fink sale headquarters. Look through the cattle at your leisure with food and drinks available.

Breakfast, Saturday morning, April 9

Rolls, donuts, coffee and juice will be available the morning of the sale.

Sale Day Lunch

Lunch will be available at the bull sale, compliments of Finks.

Sale Location

Fink Beef Genetics Sale Facility is located:

Approximately 22 miles northwest of Manhattan on Hwy 77.
Approximately 35 miles south of Marysville on Hwy 77.
Approximately 25 miles east of Clay Center on Hwy 24, then north on Hwy 77 approximately 8 miles.

The sale facility is approximately .8 of a mile north of the Randolph Short Stop gas station on Hwy. 77, on west side of the road. If coming from the North, watch for signs after crossing the Fancy Creek bridge, approximately 1/2 mile from our turn.

Livestock Mortality Insurance

Representatives from American Livestock Insurance Company will be at the sale to assist you with mortality insurance for your purchases.

Terms and Conditions

The cattle will sell under the Standard Terms and Conditions as recommended by the American Angus Association and the International Charolais Association, however the Fink guarantee is the best in the Nation and stands behind the bulls with guarantee outlined in this catalog.

Inspection of Cattle

All cattle may be seen **after 3:00 P.M., Friday, April 8, as we will be transporting the bulls to the sale location until then.** To view before the 8th, contact the Fink Ranch. Please call ahead for viewing if possible.

Liability

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety of the behavior of the animals. The owner, sale management firm, and the sale staff assume no liability for property loss or accident that may occur.

IN CASE OF INCLEMENT WEATHER, CONTACT US OR WATCH OUR FACEBOOK PAGE FOR UPDATES

Galen: 785.532.9936 **Megan:** 785.410.5559 **Lori:** 785.532.8171 **Office:** finkbull1@twinvalley.net

Dear Producers,

Thank you for taking the time to review our Spring 2022 Bull sale catalog. We appreciate everyone's support and interest for over 40 years. If we don't keep you in business, we won't be in business!

Balance is still the focus of our program—really our goals haven't changed in all of these 39 years—we just try to produce functional, profitable, realist genetics for you.

We have got to see many fads, and chases for extremes in that timeframe. We are known for middle-of-the-road cattle—ones that profit in the most areas, allowing more profit in more areas for our customers.

Our Spring sale will permanently be the 2nd Saturday of April from now on. Two main reasons are customer-focused:

1. Bulls closer to turnout-time saving feed and headaches for customers.
2. Allows customers to semen-check their current bulls later (early April) to know their bull needs prior to the breeding season.

Thank you for any potential interest in our program and please call us with questions or for more information.

Thank you,

Galen

(p.s. Actual scrotals available sale day.)

BULLS CAN BE VIEWED ONLINE AT
finkbeefgenetics.com or dvauction.com
after March 25th.

BEEF GENETICS

FOR OVER 40 YEARS!

Chad, Megan, Whitley Larson; Galen and Lori Fink

Gene, Anna, Payden & Ella Barrett

The Barrett Broadie Family

GUARANTEES, BULL BUYER INFORMATION

Guarantees

Announcing the first 3-year guarantee...A Fink Industry First!

- All bulls have been evaluated for structural soundness, fertility, and disposition.
- Starting fall 2010, the following policy has been in place.

1st Year Guarantee—Single Bull Pasture

Full coverage for 12 months from date of purchase:

- Broken penis in single-sire pasture
- Structural problems due to feet, swollen hocks

50% coverage purchase prices—Multi-sire groups of bulls

- Broken penis
- Stifle
- Broken legs
- Lightning
- Disposition

+Exception: Foot rot; nails in hooves; penile cuts due to wire, corn stalk leaves, etc.; illness; diseases; freeze damage; testicle injury, etc.

+Any reproductive injuries must be examined by a veterinarian within 48 hours of injury. Quick treatment can cure many problems. Injuries not checked and treated promptly will not qualify for 50% coverage. A letter from your vet will be requested.

+We do not guarantee bulls to freeze semen.

3-Year Guarantee

- Any bull sold by Finks that proves to be structurally unsound, infertile, due to foot shape, swollen hocks or failure to pass a complete BSE exam is guaranteed for 36 months from date of sale.
- That guarantee will apply providing the bull's incapacity is not caused **by injury, disease, or founder** since leaving Finks. The value remaining is calculated on the basis that the guarantee is reduced by one-third of the purchase for each year of service.
- A veterinarian certificate **must** be supplied by the purchaser. Fink reserves the right to have bull semen tested by two different veterinarian clinics, if requested.
- **If you have a past credit for a Fink bull, you may use that on a Fink bull in a future bull sale. Same applies to a Barrett bull, you may use it on a future Barrett bull. (We apologize, but we cannot mix credits between Fink or Barrett bulls.)**

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot fully replace a bull that is injured or dies for any reason. We recommend you insure animals against injury. This includes not putting younger and older bulls together; and having too many bulls in relation to too few cows. Any guarantees will be covered by satisfactory bull replacement, if available, or credit on future bull purchases for the amount covered.

Remember, at Finks, you keep any salvage value! Always have!

Fink Customer Marketing

For many years, we have helped customers market their cattle and we take this job very serious. As time has progressed, we have also progressed in our methods, reaching more potential buyers and contacts than ever before. In 1995, we developed calf sales; 1996, females Genetic Credit, Alliance and feedlot partnerships. We have given numerous speeches, and have had articles written about our innovative approach to customer marketing.

2010 to Present

- Developed a system to ensure that when a **customer sells calves, stockers, fats**, we get that information out to over **350 potential buyers**. With our network we make no guarantee to the sellers, but we sure do try hard! Female sales go out to over **1,200 plus!**

- Work closely with local markets, Superior Video, and other internet sales across the United States.
- Genetic credit program (rewards for carcass data)
- Feedlot connections
- Alliances
USPB: 866-877-2525
Angus & Charolais GeneNet, Ken Conway: 785-628-3004
- Genetic, marketing, consulting service
- Creekstone Farms: Contact Jake at 620-218-0128

2022 Bull Buyer Information

Bulls will sell in sire group order.

Sight Unseen Program

If you can't make it to the sale, we will do our best to represent the bulls to you. **Please call at least 5 days ahead of the sale, if possible, to go over your needs. This gives us time to determine the best possible bulls for your operation and get back with you to discuss them.** You may leave bids with us if desired, we will buy the bulls as cheap as we can, or you may call any of the representatives. **Our program is built on trust and honesty.** All bulls have had **full BSE (breeding soundness exam) by Dr. Don Musil, Prairie Valley Vet Clinic, Blue Rapids, KS. Scrotal measurements are not adjusted, they are actual. \$50 off per bull** — if bulls are picked up sale day or on Sunday, April 10, or Monday, April 11, at the sale site.

Free Delivery — To the **nearest major stockyard** in the continental United States. **Delivery will start Sunday, April 10.** We appreciate your understanding of meeting semi-trucks at a central point or along an interstate.

3% Discount on four bulls or more by one buyer.

Herd Health — At weaning, all bulls received: Resvac 4/somuback, one shot Ultra 7; Dectomax pour-on, Multimin. All bulls received vibrio and leptos at semen checking, plus Dectomax. All bulls have been checked negative for BVD.

EPDs on both the Angus and Charolais are current as of February 18, 2022.

Retaining 1/2 semen interest in every bull in this sale. We have retained an interest in every bull since 1994. Because it generally takes several years for a sire to be 'discovered,' we feel we can help our customers through various programs, 'find' and 'market' bulls that float to the top. You will own full possession and 100% salvage value of the bull. We are retaining the right to half the semen sales revenue from the bull if, sometime in the future, semen sales become a possibility. If for some reason you should sell the bull to another breeder, Fink Beef Genetics still retains that 50% semen interest. If you purchase a partnership bull and wish to have semen collected for your own herd use, that semen is 100% yours, unless you contact Fink Beef Genetics and we agree to have him collected in a joint venture. If the bull is collected in a joint venture, we split the semen production costs and the revenue of sales on a 50/50 basis. However, if you are not interested in collecting semen on the bull, Fink Beef Genetics will have the right to collect the bull for their own use and will pay expenses for collection(s). We will have him collected at your convenience.

We have not included any actual information — except scrotal measurements. Why? Because of variations due to cooperator herds we feel the EPDs, because of the use of high-proven sires, are still the best information to use. When we are convinced that all the data can be compared accurately, we will print it.

BULL BUYER INFORMATION

Thank you to the following individuals

Thank you to Dr. Don Musil, Barb Lange, and Jennifer Martin, Prairie Valley Vet Clinic, Blue Rapids, Kan, for all our health work. They are always on the cutting edge with information and advice.

Thank you to Cross Country Genetics, North, Dr. Kirk Gray, Dr. Clay Briener, Dr. Joel Anderson, and crew. Dr. Gray has done our embryo work since 1988! Special thanks to the crew for keeping it all straight!

2021–2022 Cooperators

Since 1989 we have worked closely with cooperator herds on embryo implantation in expanding our numbers. This includes commercial operations that run Fink females. This has proven to be a workable option for both parties. We believe the beef business is about working together. In some cases the breeders may show other than Fink on the registration certificate, but **rest assured** they are guaranteed with the same genetics, service and conditions. Any problems, should they occur, will be handled by Finks.

ANGUS BULLS

ANGUSGS

Powered by Neogen GeneSeek

We DNA both the Angus and Charolais bulls. The results will be reflected in the Angus EPDs. DNA is like any other tool—just keep everything in perspective on how you use it. We are trying it to, hopefully, present to you with the most current data to level environmental differences. Because of our large embryo program, cooperator herds, etc., environment can play a large role in actual weaning and yearling weights. Charolais EPDs update two times per year. The DNA will not be expressed in the Charolais yet.

As always, please contact us with questions.

Angus Bulls' EPDs have been genomically enhanced using Neogen GeneSeek through Angus Genetics, Inc.

Rick Pfortmiller, 785.230.9507, rpfortmiller@neogen.com

BARRETT ^BC CATTLE

The bulls have been developed on native- and brome-grass/fescue-mix pastures from late April to the sale date. They receive limited supplementation on grass with a rolled corn/protein blend. Starting in late December, they also receive limited brome hay.

The bulls received and passed a complete BSE the end of October. They will be evaluated again prior to the sale date. Updates will be posted at: barrettcattle.com and available as a supplement on sale day.

If you want to go through the bulls before we haul them to Galen's, give us a call: Gene: 785.224.8509 or Payden: 785.318.2004. Thank you.

BULLS CAN BE VIEWED ONLINE AT
finkbeefgenetics.com, barrettcattle.com or
dvauction.com around March 25.
Watch the websites for details.

Double-bred to Resource – the unchallenged bull in the breed for true muscle shape I'd guess. Female-maker here. Overdrive daughters are nice-uddered, and the Miss family is our best.

Blowing in the nitrogen tank is exciting with vapors going everywhere!

Fink and Barrett bulls are bred for maternal traits. It's not hard to create larger numbers — Angus are not meant to be a terminal breed — yet many are on that course. Commercial producers will be the ones that take the hit, on cow size and 'kind.'

We purchased a semen interest in Enchanted from Casey Quitmeyer in Nebraska a few years back. Enchanted is still breeding cows in the Nebraska Sandhills, as an 8-year-old.

Let the Cow Save You Money, and the Bull Make You Money

By Kris Ringwall

We've reprinted a portion of Kris' article, **Let the cow save you money and the bull make you money**, below.

Read Kris' full article and others at:

www.ag.ndsu.edu/dickinsonrec/beef-talk-articles-1

... Second, recognize the importance of monitoring cow size. **The maintenance of excessively large cows has proven difficult to offset with increased weaning weights.** The center has targeted mature cow size at 1,100 to 1,300 pounds. Although individual calf weights will be lighter, total **calf weight based on calves produced per acre will be greater, resulting in more total pounds of calf.**

Third, recognize the importance of good bull selection using technological advancements that improve accuracy. Generally, keep expected progeny differences (EPDs) above the **50th percentile within the desired traits and breed. As matter of practicality, become comfortable with bulls that are above the 50th percentile but may not exceed the upper 30th percentile for commercial production.**

Fourth, recognize the value of breeding systems, maximizing the traits of interest in the **terminal sire program while balancing appropriate traits on the maternal side. Let the cow save you money and the bull make you money.**

"You've never seen a fat athlete, have you?"

A Discussion of Ultrasound Data: Backfat — Marbling — Ribeye

We hesitate to print this data every year because we know it gets compared between other purebred breeders' sales and even within our own contemporary groups. The best advice is **use the EPDs first, then actual data provided second.**

Why are Fink bulls different so that this data isn't comparable to others?

- Fink bulls are among, if not the leanest bulls, that sell in the U.S. We do this to ensure soundness and fertility for you by not fattening the bulls.
- Feeding can make impressive IMF and yearling weights, but EPDs are still the most reliable!
- Bottomline... We try to develop bulls that cover all the bases. We just bypass fat-filled scrotals, and keep our bulls as sound and fertile as possible. Customers' carcass data for over 30 years indicate that Fink-bred cattle will compete with anyone's. We take great pride in selling bulls that should last several years.

*To borrow from the late cattleman, Andy Olson,
"You have never seen a fat athlete, have you?"*

CHAROLAIS BULLS

The beef industry is like everything else—it keeps changing, as the world changes. There will always be a demand for quality beef, the question is how much and how we get there. Charolais-cross cattle have proven they can do it. ‘Smokies,’ or ‘Cinnamon’ cattle sired by good Charolais bulls can hit many targets on a set of British or eared females. High % choice plus prime with **yield grades of 1 to 3**, without an excess of fat (**which costs money to put on**) will continue to be very profitable.

Many folks often ask why we started Charolais in 1999. We felt the direction many were taking in the Angus breed (**more growth, more terminal, more excess past the point of profit**) **was not where we felt the Angus breed was at its best.** Options—start a second breed that was proven in the feedlot and on the rail for our customers to use if they wanted. There was no second thinking the breed—Charolais. **This way we could maintain and constantly improve the Angus female and not risk making her terminal.** Hybred vigor is proven. ‘Bank’ on it.

Our Charolais are bred with attention to all traits, however, first and foremost is birth weight. We have three- to four-generations of lighter birth weight stacked in our pedigrees. We know a live calf makes the most money. We also have developed some of the highest marbling genetics in the breed to make sure our customers hit as many targets as possible. Feet, disposition, fertility, ‘slicking off,’ are just as important as all the other traits. Hybred vigor is a fact of life. Excess fat costs someone money — muscle, gain, conversions, lean retail cuts, are a fact of life. Total pounds (the right kind of pounds) are a fact of life. Need extra pounds off a set of British cows without calving problems? **Call us!**

DNA is like any other tool—just keep everything in perspective on how you use it. We are trying it to, hopefully, present to you with the most current data to level environmental differences. Because of our large embryo program, cooperator herds, etc., environment can play a large role in actual weaning and yearling weights.

Fink Spring Charolais Bulls' EPDs have been genomically enhanced using Neogen GeneSeek®.

Rick Pfortmiller, 785.230.9507, rpfortmiller@neogen.com

The DNA results are not reflected in the EPDs listed in this catalog as the American-International Charolais Association runs sire evaluations twice a year.

Ultrasound was done on 2/1/2022, by Lazy H Cattle Services, Becky Smith, Glen Elder, Kansas, certified technician, and processed through The CUP® Lab in Iowa.

Please note, full brothers are grouped together in shaded boxes like this one.

As always, please contact us with any questions, and visit our website at: finkbeefgenetics.com for the latest updates and announcements.

One of the very unique bulls in the Charolais breed. Rarely does a bull of any breed put it all together like Free Lunch. Remember these are PROVEN EPDs on an older sire. Top 20% CE, 15% BW, 20% YW, 1% SC, 5% udder, 15% teat, 3% carcass wt, 1% Marb, 15% TSI. Incredible bull to use on a set of any kind of cows. Great disposition, guts, good muscle and #7 of ALL PROVEN SIRES for marbling in the breed. Note carcass weight is still TOP 3% of the breed. Feeding your own cattle? We have found Free Lunch daughters to have more milk than his EPDs show. Free Lunch semen is nearly depleted. Many of the following bulls are out of Gold Standard daughters.

 Terminal planned programs are an extra 'niche' for many producers. Charolais do that as well as any breed. Many breeds have added Angus and Red Angus to their purebred base. Charolais have not.

 Double-bred Gold Standard!! Balanced EPDs in all traits. The results from weaning through harvest with a Fink Charolais bull can make producers very happy.

 Patriot is one of the most used bulls in the breed in the past. This one is backed up by the typical Fink pedigree Gold Standard x Free Lunch. This bull does have a small spot in one eye—it does not seem to affect him at all.

Moderate-framed embryo bull that came in lighter at weaning. His dam recently sold to Jerry and Ellen Cassady. The dam was a really neat female. Double-bred Gold Standard. Would be excellent to keep female replacements out of.

Set of older cows that you would like to get a little more 'jump' from? We have customers that use white bulls on older, lower-performing cows. The Charolais 'edge' gets a producer those extra pounds.

Better to get it out of their system when they are young!

As much proven marbling in this high-growth Flash as any bull in the breed. The dam is one of the elite cows in the breed.

RED ANGUS x CHAROLAIS BULLS

144 FINK NH 1577 OF 8946 NW
 DOB: 2/12/2021 Reg#: MP4482 Tattoo: 1577

RED ANGUS/RED ANGUS

FINK GOLD STANDARD 0153
 NH EDITH 8946 2531 GS
 FINKS EDITH 2531 7120 BG

Really nice bull. We now have these bulls working in at least 8 states. Reports are they are the easiest-keeping bulls they have ever ran of any breed. Great bulls to use on eared cattle/red-hide influenced cattle.

145 FINK 1552 OF 1950 REDEMPTION
 DOB: 2/1/2021 Reg#: MP4404 Tattoo: 1552

RED ANGUS/RED ANGUS

FINK GOLD STANDARD 0153
 FINK LADY 1950 416 GS
 FINK LADY 416 4952 FL

Dam is a Gold Standard x Free Lunch. Redemption is an old proven Red Angus sire that has influence in many commercial and seed-stock herds worldwide.

Doesn't get much better than this.
